

STRANDSMART™

New-age diagnostics

Data driven

Stage-shifting cancer

- StrandSmart™ is a San Francisco based new-age diagnostics company with a data-driven approach to stage-shifting cancer
- Our team is developing blood tests to provide primary care physicians with a first alert for otherwise seemingly healthy patients
- Most cancers are detected at later stages, when survival rates are lower and treatments are more costly and potentially harmful
- We envision a world where cancers are caught early enough to be curable or better managed

Effective screening options currently only exist for 4 out of 100s of

Cancer is a **data problem**, and the solution is **data driven**
