CONTROL THE LIGHTS

Enjoy the Power

**THE STANDARD IN REMOTE LIGHTING
CONTROL**

SAVE MONEY

Stop wasting time and money with outdated photocells and unreliable timers.

GAIN CONTROL

Remotely control your exterior illumination at the click of a button.

REST EASY

Let us worry about your lights; you have enough on your plate.

ACCESSLINK

AccessLink enables you to **Remotely Control** your exterior illumination at the click of a button. It eliminates the need for site visits to simply turn lights on or off, or to

update illumination schedules. AccessLink centralizes all of your properties into one easy-to-use system which allows you to control one, two, or a hundred properties simultaneously. Users can also customize their illumination through our multiple zone scheduling, allowing you to turn on and off different areas or zones at different times per your preference.

Before doing business with AccessLink, customers told us they were...

- Agonized by the daily cost of wasted manpower
- Upset when lights were on during the day
- Unhappy with ongoing high utility costs
- Vulnerable to the inconsistencies of photocells and timers
- Annoyed by the constant hassle of resetting timers
- Concerned for the security of their inventory if lights fail
- Aggravated with having to make unnecessary maintenance trips to multiple sites

Customers we work with today tell us they are...

- Amazed at the simplicity of our app
- Relieved at the simplicity and cost effectiveness of our system
- Thrilled to control multiple locations from one website/app
- Happy that our system integrates with their existing lighting
- Surprised they could remotely schedule both individual and multiple locations
- Confident that installations were completed correctly and on-time
- Thankful to speak with a knowledgeable, 24/7

- Uncertain when power outages occurred

customer support person
