IN STOCK

The Evolutionary 4 Bubble Machine is a revolutionary professional and durable machine that is capable of introducing enormous quantities of bubbles into the atmosphere.

- Dual nozzles generate enormous quantities of bubbles
- Enclosed fluid tank stores and keeps fluid protected against the environmental elements for long time to ensure the quality of bubble projection
- Two high power speed adjustable fans and four angles wind outlet
- Unique design of waste fluid collection bin, to collect excess bubble fluid by flowing back through pipeline instead of dropping on the ground
- Built-in LCD control, wireless control and DMX control
