

1 bag = 1 month • no clumping required

anew™

LONGER-LASTING CAT LITTER GRANULES

MADE FROM
AMERICA'S PUREST ZEOLITE™

DON'T MASK IT. DESTROY IT.™

anew granules permanently destroy the toughest cat odors (urine, hairballs, feces and vomit). They don't cover up odors. Instead, the dry granules work like a powerful odor magnet to attract, absorb, and lock away liquids, solids and gases that cause odors.

SAFE & HEALTHY

anew granules contain no harmful chemicals, thus making it safe and healthy for your cat to breathe and lick its paws. The granules are also free of dyes and fragrances, which helps prevent pet marking. Your cat will love them too because they're soft and comfortable (won't stick to the paws), which reduces dust and tracking for a cleaner home.

EASY TO USE

DIRECTIONS: Once a month, fill your clean litter box with a minimum of 2 inches of **anew** granules, but not to exceed 3 inches in height or your cat may not use the litter box. Too much litter will make a mess when your cat steps in and out of the box. For best results, remove solids daily with scooper (shake off granules, if necessary), and dispose. Thoroughly mix the litter every day to avoid saturation via the same urine spot. If there are leftover granules in the bag after filling the litter box, sprinkle them on top of the litter during the remainder of the month (only if needed to refresh). At the end of each month, dispose of the used granules in a trash can or outdoor soil. The granules are environmentally safe and also great to use as an organic fertilizer. Do not flush or put in drains. Wash the box with warm water and a mild, unscented soap. Dry completely before refilling.

CAUTION: As a reminder to pregnant women and those with suppressed immune systems, a parasite sometimes found in cat feces can cause toxoplasmosis. Please wash hands thoroughly after handling used cat litter.
