Spin Games Slot Machines

Promising superior content and technology 'delivered to your customers anywhere', Spin Games are part of a new breed of software houses capitalising on the smartphone revolution coupled with the general boom in online gaming. The internet has made it possible for people to wager real money via virtual screens, experiencing all the lights and sound of a real casino without needing to leave the house.

Conversely, thanks to Spin Games' smartphone-friendly titles, you can leave the house and play wherever you like – but once again are spared from having to suit up and venture into a bricks and mortar casino.

Gaming has never been easier or, thanks to the immersive story-driven titles available from devs such as Spin, more alluring. Software developers are an ambitious bunch; it's essential in order to survive in what is a highly competitive sector.

Spin Games are no different. Through a combination of innovation and excellence, the company has vowed to become a market leader that delivers disruptive solutions for the global gaming sector. One thing they certainly aren't short of is ambition.

Spin the Reels

Spin Games create products for both land-based and online markets, with a focus on games, platform technology, on-property mobile and gaming entertainment.

The company has a wealth of experience within these areas, coupled with an impressive intellectual property portfolio. This property includes The ROC Robust Online Client (RGS) and MIG (Multiplayer Interactive Gaming) among other cherished brands and gaming concepts. Spin products are designed to work 'out of the box', be it a turnkey online casino package or a high performance game.

Can You Smell What the Roc Is Cooking?

At the heart of Spin's gaming endeavours is the ROC. The firm's Robust Online Client is supposedly the future of online gaming, and it's got some impressive credentials to back up these bold claims. Essentially, the ROC is a remote gaming server and for-wager game content delivery system.

The ROC development console is a state of the art piece of kit that supports HTML5 game engines. This is a trend that is becoming increasingly prevalent in the gaming industry as software houses move away from Flash-based multimedia.

HTML5 games are of course ideal for mobile, and this is where Spin believes its future – and indeed the future of the industry as a whole – lies. The company is constantly trying to push the limits of what can be done with current browser and hardware technology, and the ROC is at the centre of it all.

The proprietary remote gaming server promises a plug and play dynamic and the ability to host customised content, tournaments and peer to peer product systems.

With seamless integration into third-party APIs, the ROC is compatible with online casino operators' backend systems. Extensive logging, reporting and security functionality, support for multiple game engines and modular architecture are just some of the features that make the ROC one of the best gaming platforms on the market.

Multi-Player Interactive Gaming

The ROC isn't the only proprietary tool Spin have to shout about. MIG (Multi-Player Interactive Gaming) is a powerful piece of software that allows plays to engage in community-based games on their mobiles, either for the purposes of wagering, tournaments or social gaming.

Thanks to MIG, players can share a main display and join in the same game, be it Spin's MIG-compatible Texas Hold 'Em Poker, All Star Black Jack or Double Dragon Baccarat. MIG means, for example, that a group of mates can simulate playing poker at the same table in a casino, only instead of chips and felt the action is unfolding with pixels and handheld devices.

There's the main screen in the room – it could be a television, monitor or PC screen – that serves as the communal poker table, and then there's each player's mobile, where they can view their cards before deciding which ones to keep or cast onto the communal table. MIG makes all this possible.

Special Features That Will Turn Heads

Speaking of proprietary technologies, **Spin Games** aren't done. They also have 3ML3 – 3D HTML5 Gaming – also known as ML3 or Multi Layered 3D. What does all this mean? In plain English, it's a technology that gives HTML5 games an unprecedented field of depth. The illusion, which is generated on screen in real time, is uncanny. Thanks to 3ML3, **Spin Games** can generate 3D slot games within the browser without requiring the installation of any special software.

Best of all, the technology's lightweight design makes it ideal for playing on mobile devices, resulting in a gaming experience that is about as lifelike as is realistically possible when playing on a small screen, or indeed any size of screen for that matter.

The final nifty bit of tech Spin possess is a pair of special feature sets that surface in their casino games. The first of these is called Gambler's Multiplier which kicks in any time a win of 10 or more credits has occurred in a game and is activated at the choice of the player.

The feature, which involves a classic high-low gamble involving a deck of 52 playing cards, gives players the opportunity to increase their winnings or stick with what they've got and resume the main game.

Wheel Power is another bonus multiplier whose concept involves two wheels, with multipliers spinning on the first reel and awards on the second. It's another way for players to chance their luck in an attempt to increase their winnings.

Spin Games in Action

Spin's games can be divided into four categories: slots, video poker royale, action bingo and keno. The slots are characterised by warm colours - lots of reds, golds and purples - and themes that hark back to heroes, seductresses and explorers from the golden age of global discovery. Liberty, American Gold Rush and Triple Bombshell all accord to this formula.

Many of their slots feature a 3 x 5 layout with mystery column wilds, free spins and a feature game multiplier. Other noteworthy [Spin Games](#) titles include Shadows of Olympus, Wild Gypsy and Fire Dragon. When it comes to video poker, players can choose from such variants as Double Regal Poker, Deuces Wild and Jacks or Better. Action bingo comprises four titles: Empire Action, Fire Ball Action, Mega Ball Action and Deluxe Action. Lest that wasn't enough action to be had, there's Ancient Thunder Keno, which is based on a [standard Keno game](#) with a range of multipliers and bonuses thrown in, and Jungle Spot Keno which boasts a 20 number draw and multiplied bonus games.

But wait, there's more: [Spin Games](#) also offer Last Blast Keno, Tropical Vacation Keno, Prairie Thunder Keno and Luck of The Bonus Keno.

[Spin Games](#) slots and other casino games are slick, colourful and fun to play, even if they're not the most unorthodox of titles. Aesthetically, Spin are breaking no new ground, but behind the scenes the firm are working wonders thanks to their proprietary technologies that make mobile and multi-player gaming a rich and enjoyable experience that's unlike anything else currently on the market.

The depth of field and speed of Spin's mobile gaming, aided by its commitment to HTML5 and powered by proprietary technologies such as the ROC and MIG, have earmarked the gaming titans as one to watch. Under their stewardship, the future of online gaming is looking very bright indeed.

Most Popular Slots

Best Casinos That Offer Spin Games Games:

Beticus Maximus Slots

The sands have been cleaned, the gladiators are waiting, and the crowd is going wild, are you ready to step into the arena? Fame and glory are waiting in a new Ancient Rome themed slot from Spin Games. Paying a humorous tribute to the power that once was the Roman empire, Beticus Maximus is a slot designed with history fans in mind.

Adding a Roman theme to some of the most popular Spin Games features, the free Beticus Maximus slot is an unusual but highly fun take on a Roman slot. Mobile-optimised, as well as available to play on desktop with no download needed, this Roman slot is a cut above the rest when it comes to special bonuses and unique features. For 243 ways to win a Roman fortune, and a classic 5 reels, 3 rows layout to explore, get ready to try your luck in the arena!

Roman Glory

Whether you are a fan of Roman history, or just an eager gambler after some top payouts, Beticus Maximus has plenty of excitement on offer. The controls of the Beticus Maximus video slot are very modern in design, so for experienced gamblers, the gameplay shouldn't be too difficult to get to grips with. At the bottom of the screen, there is the option to set a max bet of 880 coins, or adjust the value, with the low limit bet being only 44 coins. You can also check the coin value, use an auto play for between 10 and 200 spins, and keep track of your balance.

The menu at the side of the screen allows for some more advanced game controls, such as changing the reels to turbo. Punters can also view the full pay table from the side menu and explore the 13 game symbols. Most of the standard game symbols take the form of card symbols, with A to 9 represented with a very colourful design. 4 themed symbols join the card symbols, offering significantly larger payouts and adding a bit of variance to the screen display.

Time for a Party

Boosting the themed side of the online slot a little more, 2 of the 3 bonus symbols present in Beticus Maximus are also themed. The golden coin scatter symbols are a fun and vibrant addition to the reels, used to trigger the free spins game feature. 8 free spins are awarded to players who manage to land 3 of the scatter symbols on a win line. For the duration of the free spins, a 2x multiplier is in effect and all the wild symbols transform into a sticky wild. The toga party wild symbols can also provide a 2x to 4x multiplier in the base game when used to substitute for other symbols.

There is one more symbol to keep a look out for on the reels, the multi-coloured Wheel bonus game symbol. Only two of the bonus symbols are needed to start the Wheel Power mini game, which takes place on a new screen with a large double layered game wheel. A spin on the wheel can land players with impressive coin jackpots or the chance to spin again, with a max of 25x the bet and 4 re-spins given on a single spin.

More Ancient History Slots

You can delve a little deeper into Ancient history with a spin on some of the latest releases in online casinos, many of which have features that can compare to those in Beticus Maximus by Spin Games. Experience a different historical period with a spin on The Vikings by 777IGT. The Romans and Vikings were very different, and the contrast between the style of Beticus Maximus and The Vikings reflects this well. The Vikings has a 50 payline, 3 jackpot tiers, and a low to medium variance rating, as opposed to the medium rating that Beticus Maximus provides.

Gods of Fortune from Spin Games allows players to test their skills on a slot that features a taste of traditional Chinese culture. A little more like the design in Beticus Maximus, Gods of Fortune offers a 243 ways to win payline and a very good 96.08% RTP, which is higher than the 96% provided in Beticus Maximus.

A Tribute to Rome

Beticus Maximus by Spin Games has both exciting aspects and slightly lacking elements. Overall the online casino game is well put together, featuring a good range of bonuses and some high-paying symbols. However, the theme is not as well covered as some of the other similar online slot machines on the market. The high density of card symbols detracts from the primary theme, leaving the reels looking a bit bare on some spins.

Thankfully, the bonuses do mean that the appeal of Beticus Maximus isn't limited to players that solely look for Ancient Rome slots online. For theme alone, Beticus Maximus doesn't hold a high level of longevity, but once you factor in the good betting levels, enjoyable selection of bonuses, and the extensive game controls, Beticus Maximus becomes an online slot that is more than worth a spin.
