

School Consultation Services

Our Board Certified Behavior Analysts (BCBAs) support districts, schools, classrooms and individual students in both public and private settings. GBC aba school consultants utilize several ABA based consultation and training methods to help schools improve already existing systems or develop systems to improve behaviors of classrooms and individual students. We work collaboratively with the district, administrators, teachers, staff, paraprofessionals, and interdisciplinary teams to develop systems-wide behavior supports that promote student independence, positive behaviors, and greater opportunities for inclusion. In addition, GBC aba consultants help teachers and staff implement effective teaching practices and classroom systems based on the principles of Applied Behavior Analysis (ABA). GBC's School Consultants want to help all schools utilize the methods of ABA to increase staff competence in improving positive behaviors in all students, which will result in measurable academic gains for schools and students.

GBC aba Provides:

- Individualized Educational Evaluations (IEE) by a BCBA
 - Assisting School Teams with Functional Behavioral Assessments (FBA)
 - Assisting School Teams with Behavior Intervention Plans (BIP)
- PBIS/MTSS Systems Level Consultation
