SMOOTH AUTO SLIDING PAN SHOTS

Pan-100 Track Rail Slider provides really great way to add a lot of cinematic production values to whatever you're shooting; whether it's a traditional slider mode, a parallax mode or a panoramic mode - they're really great to add a lot of depth and dimension to your shots.

TRADITIONAL STRAIGHT SLIDER SHOTS

Adjust the guide bar to parallelize with the two rails to create a straight shot

Adjust the guide bar oblique from lower left to upper right to create a panoramic shot

PARALLAX SHOTS

Adjustable the guide bar oblique from upper left to lower right to create a parallax shot

CARBON FIBER RAILS

ULTRALIGHT AND SMOOTH

The Pan-100 Track Tail Slider features a high-grade carbon fiber rail system that is sturdy, yet lightweight. The dual rail build combined with the aluminum slider carriage work together to create a structurally tough frame that can hold up to 10 lbs of weight.

The slider carriage features 3/8"-16 mount for attaching quick release plates, or you can attach it directly to your tripod. The slider carriage has a side mounted brake so you can lock your camera in place. Use the embedded bubble level to make sure your slider is completely balanced.

SMOOTH ROLLERS

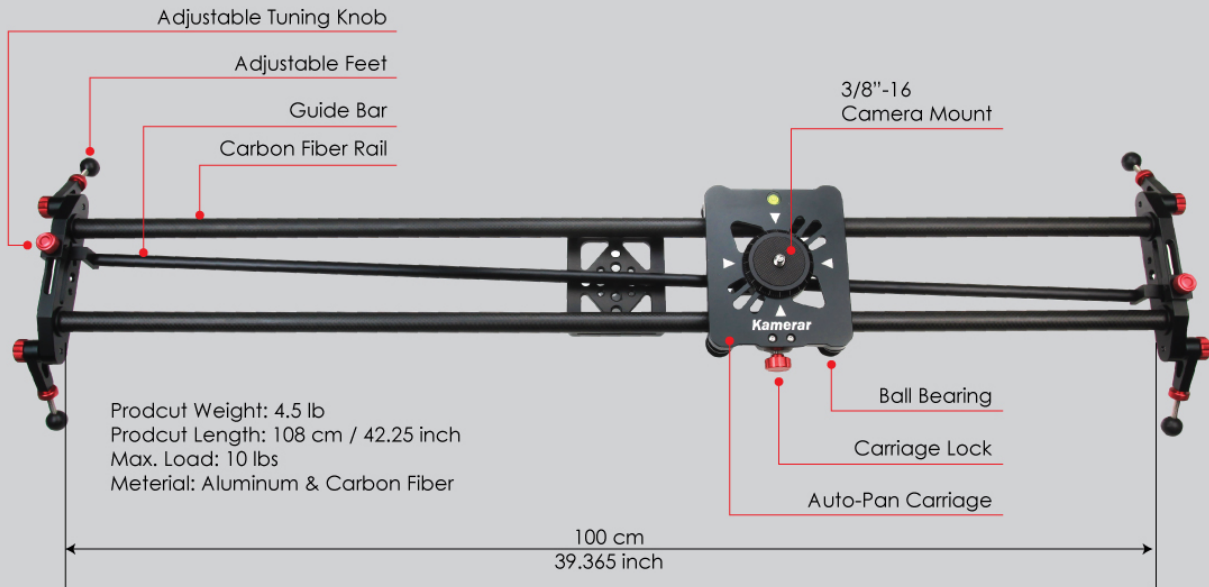

It features rollers that slide smoothly on the sturdy carbon fiber rails. With the increased surface area of the rollers, the weight is distributed evenly and noise is greatly reduced from the sliding motion.

FULLY ADJUSTABLE LEGS HEIGHT AND ANGLE

The fully adjustable legs allow for easy leveling of the slider. When shooting on uneven surfaces, adjust the height and angle on each leg individually for the smoothest shot possible. The round rubber pads on each leg helps to further stabilize your shot.
