#### RECORDED Green Globes for New Construction (NC) Webinar

This course is intended for design and construction professionals interested in green building rating systems. It provides an overview of the features and use of the newly released version of Green Globes for New Construction (NC), which is based on an ANSI Standard (ANSI/GBI 01-2010: Green Building Assessment Protocol for Commercial Buildings). The updated program contains major enhancements throughout, with a particular focus on the Energy and Materials & Resources sections. It also incorporates criteria to evaluate the Guiding Principles for Federal Leadership in High Performance and Sustainable Buildings.
