

Fastest Route to Value

Cloud Logistics was founded as an alternative to traditional slow moving, high priced transportation management systems. TMS from Cloud Logistics offers a modern, intuitive user experience that optimizes carrier selection, simplifies load tendering and communication, and streamlines payment while increasing visibility and offering real-time reporting.

ANALYZE

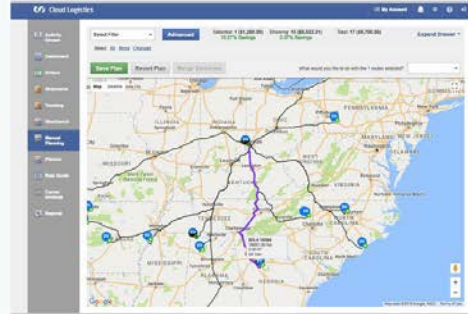

Plan

Save up to 10% on freight costs.

Good planning (load consolidation, mode selection, carrier selection) can save 5-10% of a company's freight costs. Cloud Logistics has great solutions for planning.

- Automated consolidation/optimization.
- Manual Planner: A map-based tool with real-time decision support for load building.
- Carrier Assignment Optimization: An algorithm that simultaneously considers capacity constraints and costs for heavy and/or full truckload planning.

Execute

Easy, fast and intuitive.

Planners and carriers value efficiency and simplicity.

- Automated waterfall tendering for 'hands-free' execution.
- Simple spot quoting saves dozens of emails per shipment.
- Integrated internal and external benchmark data provides context-sensitive decision support.
- Bulk actions via 'Delivery' button creates tremendous operational efficiencies.

Shipment ID	Carrier	Status	Weight	Rate	ETA	Actions
10000001	Carrier A	Booked	10000 lbs	\$1000	2023-10-25	Deliver
10000002	Carrier B	Booked	5000 lbs	\$500	2023-10-25	Deliver
10000003	Carrier C	Booked	15000 lbs	\$1500	2023-10-25	Deliver
10000004	Carrier D	Booked	8000 lbs	\$800	2023-10-25	Deliver
10000005	Carrier E	Booked	12000 lbs	\$1200	2023-10-25	Deliver

Share

Built-in social network.

The TMS industry's first built-in social network for collaboration between shippers, carriers and 3PLs.

- Instant messaging between trading partners.
- Share documents and images.
- Mobile app for drivers (and GPS location updates).
- Context-specific updates.
- Reportable and alertable.
- Creates accountability.

Monitor

Visibility is the greatest 'soft' benefit of a TMS.

Tracking where shipments are is more than EDI updates from carriers.

- Built-in social networking with the Logistics Activity Stream to create seamless collaboration with carriers.
- Mobile app available - free for owner/operators.
- Integration with third-party GPS tracking devices.
- Easy, intelligent alerting to email or text messages.
- Customizable workbench and visual tagging.

Shipment ID	Origin	Destination	Status	ETA	Actual	Delay	Reason	Alerts
1001	Atlanta, GA	Los Angeles, CA	On Route	04/25/18 01:38 PM	04/25/18 01:38 PM	00:00	None	0
1002	Atlanta, GA	Los Angeles, CA	On Route	04/25/18 01:38 PM	04/25/18 01:38 PM	00:00	None	0

Audit

Save up to 3% of total freight spend.

Auditing freight bills is a complex and often tedious process. Many companies expensively outsource it. Automating the process can save 1-3% of total freight spend.

- Carriers can submit invoicing via EDI or the Carrier Portal.
- Rules-based exception identification.
- Social network to facilitate dispute resolution with carriers.

Category	Rate	Amount
Net Freight Charges	76.00%	\$1,289.67
Accessories		\$117.78
Net Freight Charges		\$184.43
Accessories		\$117.78
Fuel Surcharge	11.60%	\$67.74
Total Accessories		\$117.78
Total Accessories		\$17.78
TOTAL		\$452.21
Resolution Amount		\$452.21

Analyze

Create future savings.

Leveraging the massive amounts of data a TMS generates is key to creating future savings.

- Easy-to-use report writer. Designed for business users. Technical skills not required.
- One-touch integration with MS Excel.
- Customizable dashboards.
