Comfortable

Supports Gear VR

Calm is the #1 app for meditation and mindfulness.

Transport yourself to a tranquil lake in the mountains, to a lush forest in the majestic redwoods, or to lapping waves by a pristine white sand beach.

Enjoy 10 meditations led by Calm's Head of Mindfulness, Tamara Levitt, about Gratitude, Choice, Resilience, Impermanence, Letting Go, Mountains, and the meaning of beautiful concepts like Wabi Sabi and Ubuntu.

Only 180

The app is ok for how long i used it, which wasn't long. There are only 3 scenes, 2 are video with movement and 1 one a picture with no movement (forest). But the killer here is it is only 180. Oh well, it was a freebie. Maybe charge .99 cents and show the complete 360?

I liked the visuals, but wished they extended further in the POV. I almost wonder what's the point of you close your eyes on meditation. And the audio cut out is too abrupt, it was jarring. I thought there was an issue. Maybe keep some white noise going, or fade gradually.

A nice translation of the app

I use calm on my phone everyday, so I'm really thrilled that I now have calm on my go. Some suggestions though: 1) I'd like to be able to connect to my account, 2) I'd like some unique meditations here - why should they be telling me to close my eyes when I'm using a vr headset, and 3) I'd like the opportunity to do a less or lightly guided meditation in the environments that they've created.

This is the first meditation I've done in VR. I don't usually use anything but a timer to mediate. Doing it in VR was very engaging. The "debate" over 180-360 video does not apply when you are closing your eyes to relax. It's really neat to teleport to that environment when you open your eyes after relaxing.

Simple and Intuitive

Really like the intuitive UI design and straight forward user flow. Although the weight of the headset feels more obvious after I got relax. Overall, I can totally see the big potential of this app.
