Brandon Kinder, President bioPURE

What is bioPURE

bioPURE is a Microbial Disinfection Company!
Our process eliminates virtually all germs and bacteria. We clean the stuff you can't see.
Our service provides complete coverage while being safe, eco-friendly, and cost effective.
We combine physics with chemistry. Our super-charged delivery system, coupled with an EPA-registered hospital grade disinfectant, is revolutionizing the standard of clean.
The bioPURE process also kills mold and bacteria.
The results associated with bioPURE treatments can not only be quantified through air and surface quality tests but can also be recognized quickly from customers with severe allergies and odor sensitivities.

What You Can Expect From Us

No Contracts

We are so confident that you will love our service, we don't need to bind you to a contract. We do, however, offer agreements that allow you to take advantage of discounted pricing.

Peace of Mind

bioPURE is happy to serve. This means you can have peace of mind when you have us come to your home. Helping our customers feel confident in our service is very important to us, which is why we're committed to taking every step necessary to make sure they feel good about choosing us.

Trusted & Experienced

With more than 20 years in the chemical industry and 5 years in the germ remediation industry, we have been trusted by hundreds of customers to make their lives and homes healthier again.

Satisfaction Guaranteed

Our goal is always to satisfy the customer's expectations. While we can't guarantee you will never get sick again, we can guarantee that we will always call ahead to inform you of our arrival and a professional technician will come to your home to assess and use the most advanced technology to help keep your home free of germs.

bioPURE News

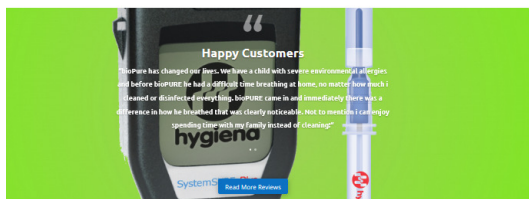

National Institute of Decomamination Specialists

On April 24th, members of the bioPURE Operational Excellence team from across the United States attended a course on **Microbial Pathogens and Antimicrobials** presented by Don King, Director of the National Institute of Decomamination Specialists.

"This course will greatly enhance the ability of our staff to understand, understand and identify the wide variety of germs that are hazardous to us, our jobs and our customers' health and safety."

"We were very pleased with the content of the course and its applicability to our commercial, home, and industrial cleaning needs and our residential and business customers," says Don King, NIDS Director of Operations.

"As we continue to grow our customer base and the geographic footprint of our residential disinfection company (bioPURE), we value working closely with experts like Don King to bring the best possible solutions to the disinfection of surfaces for our customers."

Primrose, "The cleanest facility in the Upstate"
