

DESIGN

The Design department is an integral function of the company's activities that support project work embodying the philosophies of Gordon Murray Design and iStream® to deliver lightweight, efficient and innovative vehicle packages from concept through to vehicle build.

The primary focus of the work is to provide innovative technical solutions that meet project needs, these include:

- Vehicle structures
- Vehicle & Occupant Packaging
- Powertrain
- Chassis
- Body & Hardware
- Electrical Systems
- Trim
- Tooling, Jigs & Fixtures
- Manage Vehicle Bill of Materials

The key elements of the Design team are:

To Support the Styling Department to ensure Theme Selection & Concept Gateway objectives are met

Ensure the compatibility of design solutions against Vehicle Specification, relevant Safety and Regulatory requirements

Work with the Engineering division of the company to ensure the design output is aligned with cost, manufacturing, performance and structural targets

Integrate hardware with styled themes and support vehicle build process
