

SERVICE

Dispensing as a Service

Designed to keep you pouring

We don't believe in install-and-vanish. We treat every client as a vested partner – from initial setup through continual optimization – to bring ongoing value and growth to your beverage program.

DaaS Model

We approach smart dispensing as a mission critical application requiring near perfect uptime. Our unique solution and dispensing as a service model keep our goals directly aligned with yours, offering ongoing value through a number of ways.

Futureproof Solutions

Dispensing as a service allows us to continually offer you the latest and greatest with hardware and software upgrades to keep your solution top of the line.

Lower Cost of Ownership

With TapWise, you pay based on what you actually need and how you use the solution without any surprise expenses popping up after we've turned the taps on.

On-Demand Scalability

Let our detailed pour data inform how your program scales, whether it means adding taps, facilitating pop-up service, or mixing up your beverage offerings.

Vested Partnerships

Each client as a long-term partner so we offer monitored support, regular on-site maintenance checkups, upgrades, and more to make sure your program runs smoothly.

Ready Expertise

We'll make sure you have all of the tools you need. Our team of experts is available with recommendations on everything from refrigeration to pouring best practices.
