

## WILD – THE BEST CARGO VAN ALTERNATIVE

Tired of dealing with your unsafe and smelly old service van? WILD is the ideal model for anyone looking for characteristics similar to a regular cargo van.

With a 53" interior height, it's large enough to move around inside, with the added advantage of full-length side doors for easy access from the outside. With optional shelves system, maximizes your space and secure your tools.

SECURITY

PORTABLE TOOLBOX

### MORE ACCESS

The amazing side door opening of 24" x 84" is the widest in the industry, preventing any dead zone in your cargo area.

### STRENGTH & DURABILITY

Like all our models, the WILD was made to last and built using only Owen's Corning fiberglass. Our engineered composite recipe makes it lightweight and strong and our lifetime guarantee against manufacturing defects proves it.

### GO GREEN! GO WILD!

Make a smart choice with this lightweight and aerodynamic model, designed to be extremely fuel efficient and cost-effective.

## EVERYONE ENJOYS RIDING A PICKUP TRUCK

WILD model allows you and your employees to improve your comfort when compared to a cargo van. Our units separate the cargo zone from the driver's cab, creating a natural sound barrier between your tools and any other equipment you may carry, to prevent annoying sounds coming from the back during transport.

By having a separate cargo and cabin, the WILD also cut out the smell emanating from the back of your van when transporting chemicals, oil, and gas.

During summer and winter months, SpaceKap drivers will find that their cabin will be cooled and/or heated much faster than in a regular service van.

Finally, in the event of an unfortunate accident, the driver of a WILD will be safer and have fewer chances of getting hurt. WILD is the best service van alternative out there!
