STRATOSPHERE

Bring Your Business to a Higher Level with Stratosphere

Stratosphere is a business intelligence solution designed to streamline your business operations and maximize profits. Intuitive, easy to use software with the most advanced, flexible and scalable features, Stratosphere works 24/7 so your business never stops.

Our robust modules are designed to automate the complex supply chain management process. We understand that every business is unique and one application will not fit all. Through open API integration, we can customize and simplify workflow collaboration with internal teams and outside partners to enhance your company's productivity.

- **Provides a complete real-time view across the entire organization**
- **Customizable and configurable, application modules can be used as a full suite or individually**

Driven by customer demand and rapidly evolving technology, Stratosphere is available on the cloud or as an on-premise resource. Our cloud offering includes hosting, back-ups, email integration, security, 24/7 monitoring and support. If you have an IT team, you can opt for an on-premise version and manage your own infrastructure.

Developed by our team of business process experts and application architects, we are committed to forming true partnerships with our clients and delivering a true advantage in the marketplace. Your success is our main objective and we consider our company to be an extension of your team.

SEAMLESS INTEGRATION INTO ACCOUNTING, HUMAN RESOURCE MANAGEMENT AND CRM APPLICATIONS
