Install

This app is being used by the Screenomics Lab at Stanford University and by academic affiliates for academic research. The app uses Media Projection API to capture screenshots and upload them to a server. Screenshots are captured upon screen unlock and at 5-second intervals. They are uploaded while connected to wifi, and deleted thereafter.

★★★★★ September 8, 2018

App works very well. Deserve a 5+ stars ***** App works in background after I installed. After that I can use my phone in everyday life normally, there's no interrupt from app at all. This makes my usage's experience as smooth as silk.

WHAT'S NEW

Multiple new features; better organization of transmitted data
