Intuitive from the start

Designed by pharmacists from the ground up to be simple **and** powerful.

Patient Data

Become the provider accountable for maintaining current diagnoses, medications, immunizations, allergies, and adverse events.

Clinical Management

Improve outcomes by establishing care goals and tracking interventions for each chronic condition.

Case Management

Stay organized using follow-up tasks for scheduling, adherence checks, and other to-do items.

Patient Portal

Empower patients by sharing medication lists, care plans, and personalized instructions through a secure portal.

Dashboard

Measure quality and productivity using clinical, operational, and financial metrics calculated from patient care data.

Reporting

Achieve specialty pharmacy accreditation and conduct research with raw clinical data exported from the platform.

Practice Networks

Strengthen your value-proposition by aggregating data across multiple practice sites and stakeholders.

HIPAA Compliance

Rest assured knowing your patient data is secure. DocStation is built on technology that goes above and beyond current HIPAA security requirements.

Ready to get started?

Better health for your patients, better experience for your team.
