Cleanpal- US Size

- Beverage +
- Bins +
- Crates +
- Crystal Clear Crates
- Display <
- Dollies
- Pallets**

Designed for today's supply chain needs, Cleanpal offers several benefits:

At just 33lb, it provides easy manual handling, making it a more ergonomically friendly solution compared to wood.

Cleanpal's reduced weight allows for more content per pallet.

Rest-easy with an average of 3-6% more merchandise being loaded onto each vehicle, in comparison to wood pallets.

Cost-saving durability. Cleanpal experiences a damage rate of just 1.5% per trip compared to more than 25% for wood pallets.

Increased life expectancy means more reliable performance in the supply chain, with fewer delays, disruptions, or product damage resulting from pallet breakage.

Space Saving! A no-nonsense pallet that reduces overhead with a 3:1 empty pallet nesting ratio, providing space-saving efficiency during return and storage.

A vastly improved pallet life, along with fewer delivery and return miles.

Cleanpal can be used in conjunction with Polymer Logistics' IoT tracking systems to provide real-time supply chain visibility for the products that it carries.
