ActivityStudio

One Platform for Operational Excellence

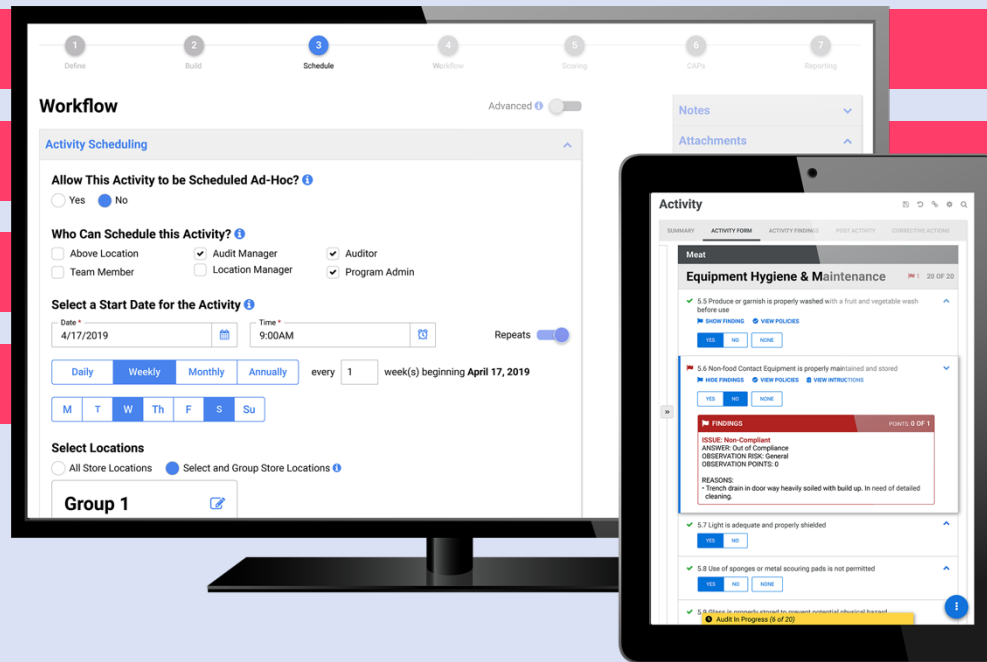

Drive Operational Excellence with ActivityStudio

Design

Assess

Improve

Repeat

ActivityStudio makes it easy to develop and execute audit, self-assessment, inspection, evaluation, checklist, and survey programs to drive Operational Excellence in any retail or facility.

One Platform for Quality, Risk & Compliance

One Platform for Program Management

Integrated Policy Management

Quickly and easily create your policies, Standard Operating Procedures (SOPs), and training documentation, complete with rich text editor and document/media storage. Publish content to specific user groups, or companywide in real-time.

The screenshot displays the 'Workflow' configuration page in ActivityStudio, showing a multi-step process: 1. Define, 2. Build, 3. Schedule, 4. Workflow, 5. Scoring, 6. Cops, and 7. Reporting. The 'Schedule' step is active. The 'Activity Scheduling' section includes: 'Allow This Activity to be Scheduled Ad-Hoc?' (Yes/No radio buttons, 'No' selected); 'Who Can Schedule this Activity?' (checkboxes for Above Location, Team Member, Audit Manager, Location Manager, Auditor, Program Admin, with 'Audit Manager' and 'Program Admin' checked); 'Select a Start Date for the Activity?' (Date: 4/17/2019, Time: 9:00AM, Repeats: Weekly, every 1 week(s) beginning April 17, 2019, with a calendar view showing 'Su' selected); and 'Select Locations' (radio buttons for All Store Locations and Select and Group Store Locations, with 'Select and Group Store Locations' selected). A 'Group 1' field is visible at the bottom.

Intuitive Form Builder

Drag-and-drop to create any activity, from complex audit forms with repeat detection to simple checklists and surveys. Link questions to policies and SOPs to reinforce brand standards, and promote best practices and know-how.

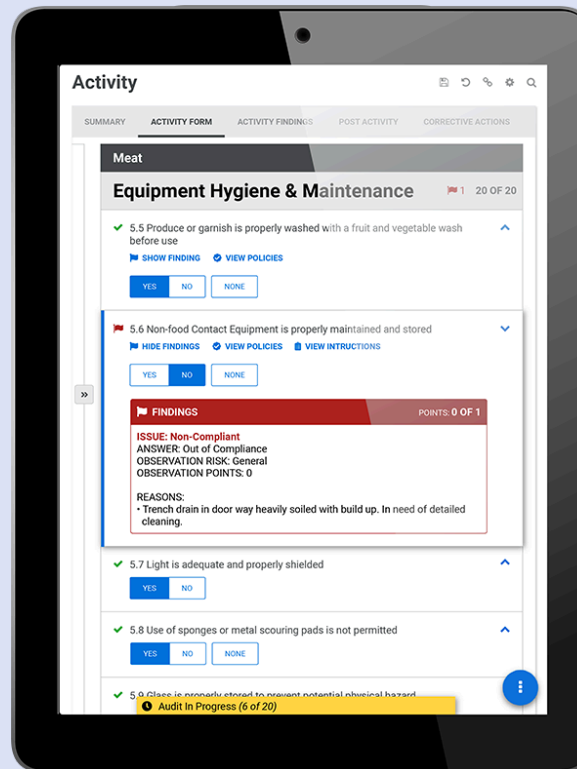

One Platform for Data Collection

Mobile

Optimized

Work untethered.

Perform activities online or offline with native apps for iOS™, Android™, and Windows™

Integrated

IOT

Define the protocols for addressing and reviewing Corrective and Preventative Actions (CAPAs). Provide recommended actions and enforce timeframes to respond by criticality.

One Platform for Continuous Improvement

Closed-loop Corrective Actions

Define the protocols for addressing and reviewing Corrective and Preventative Actions (CAPAs).
Provide recommended actions and enforce timeframes to respond by criticality.

Actionable Insights

Data visualization, KPIs, and reports provide status and actionable insights for every level of your organization. Set rules to bin locations, products and employees to measure performance against defined program goals.
