When you supply an asset to Compound, cTokens are minted. The number of cTokens minted is the amount of underlying asset being provided divided by the current Exchange Rate.

```
1 function mint(uint mintAmount) returns (uint)
```

- `msg.sender` - The account which supplies the asset and owns the cTokens.
- `mintAmount` - The amount supplied, in units of the underlying asset.
- RETURN - 0 on success, otherwise an [Error Code](#).
