

Your balance,
tokenized.

How it works

Supply assets to the protocol,
get cTokens.

ERC-20

cTokens conform to the ERC-20 standard, and work just like other assets.

Tokenized Balance

cTokens represent your balance in the protocol, and accrue interest over time.

Useful Collateral

By holding or receiving a cToken, you can borrow from the Compound protocol.

Interest, unique to each asset

As a market earns interest, it's cToken becomes convertible into an increasing quantity of the underlying asset.

Compound USD Coin
