How sayso works

1

Website visitors have questions and want to speak with someone over voice or video

2

Based on location and what they're viewing, they're offered a list of discussion topics

4

The call is initiated and carried out through the browser without any downloads or dialing

What we're hearing

Great

2019-08-15

George Kalman
President, Sensoria Networking, Inc.

Initial reaction was that **sayso** marries the company
to the directory to the website. Could not make more
e.

Brian Erle
Director Technologies, Integrative Re
Center

Very simple to set up, make changes and I affected immediately. The fact that OnSIP this new feature at no additional cost help
