Comtron

Comtron's Physician Revenue Cycle Management

More and more healthcare providers today realize the importance of a sound end-to-end solution that can manage their operations effectively through next generation business models. While Physician settings and Healthcare providers on their path to HIPAA Compliance realize the importance of becoming technologically adept towards MACRA compliance, cost reduction is a major concern.

We realize that healthcare settings require comprehensive process insight to achieve unparalleled targets in business efficiency and effective control over the care continuum. Medgen EHR suite of products was designed with this vision to empower patient centric healthcare providers with the technology ability they need to meet tough financial targets at affordable costs.

How Medgen Revenue Cycle Services Resolves Claim Filing Issues

Medgen approaches Revenue Management for your organization through insightful discovery of significant interactions and dependencies between diverse entities involved in Claims processing scenarios. Our solution is built with comprehensive capabilities that help elucidate key performance issues throughout your Billing system:

Secure, affordable system built to discern key issues in Revenue Cycle Management featuring results driven financial planning during the Claims process

100% people driven system with In-built capability to handle large Claim volume in fraction of the original time frame, ensuring marked reduction in processing time and leading to faster Claims processing cycle and workforce efficiency

Auto-Posting of Claims, driven by high performance modules built for performance in fast paced healthcare settings

Maximum control over Patient's claim data allowing customizable views and actions executable after thorough understanding of key pain points in revenue cycle analysis

CPT and ICD-10 integrated comprehensive reporting modules for identifying loopholes not just in the Claims process, but also from the management, maintenance and financial standpoints

Dedicated processes that specifically address issues related to Outstanding Claims and Denials helping health systems perform optimally

medgen ehr HOSPITAL REVENUE CYCLE SERVICES

Do Not Compromise on Revenue!
Reduce Cost of Collections, and increase your Revenue today with Medgen RCS.In the current Healthcare climate, hospitals are drained by the resources needed to effectively manage all aspects of its A/R in house. The function is highly resource intensive, and the investment in technology to do it efficiently and effectively is immense.

Fifteen cents of every US healthcare dollar goes toward revenue cycle inefficiencies.
As hospitals face more and more financial challenges and are forced to reduce headcount across the board, they are at the same time under pressure to improve performance.
Medgen RCS analyze your revenue cycle to enable cost reduction, streamline processes and improve efficiency, resulting in higher collection and ROI. From first patient interaction to Collections Medgen support the entire Revenue cycle. Reduce errors at the front end, resulting in increased revenue and decreased denials

Improve quality of admission data
