

boostpad

drop it, charge it.

## **This is the Boostpad.**

It's an ultra thin, flexible slide resistant wireless charging pad that packs the most advanced technology in wireless charging, capable of charging multiple devices placed in any position, anywhere on the pad, all at the same time.

## **Charge in Any Orientation, Anywhere.**

Unlike traditional wireless chargers, Boostpad's patented multi-surface technology allows you to place your wireless charging compatible device practically anywhere on the surface without worrying it's not directly over the charging spot.

## **Boostpad Ships Summer 2019.**
