SOLUTRAN[®] EBT SERVICES

Solutran has unparalleled experience building EBT technologies for today's America. Over the past decade, we've assembled an industry leading team that that understands the demands faced by SNAP and WIC programs. As the only provider of online and offline EBT services, you can feel confident you will be getting a solution that best serves and supports your program.

Our approach to selecting the right solution for you is simple – we listen. No one knows your program better than you do, and our EBT experts are here to help give you the tools to develop the best solution for your participants.

THE NEXT GENERATION OF PAYMENT TECHNOLOGY

Our next generation S3™ EBT Platform is an easy-to-use system backed by highly sophisticated and fortified technologies. The S3™ EBT Platform design is a highly

specific processing requirements of SNAP, TANF, and WIC. Solutran is the only processor in the industry that serves WIC EBT needs via their choice of online or smart card systems. With this leading edge technology, we've created customized programs to fit the needs of each EBT client in both the private and public sectors.

SNAP

Solutran is committed to helping each of our clients serve their constituencies. We work closely with each program we serve to develop efficient and effective technologies so that they can better serve the participants in their SNAP and TANF programs. Our user-friendly interfaces
