OVERVIEW

Kong Cloud provides you with Kong Enterprise performance and functionality with SaaS simplicity. Hands-free upgrades allow you to take advantage of the latest Kong capabilities without worry. With the flexibility to deploy across cloud vendors, Kong Cloud enables you to utilize the best tools offered by each cloud vendor without fear of lock-in.

Deliver faster innovation through zero-touch, automatic updates and cloud-speed cadence of new product functionality. Get the operational benefits of a tested and hardened environment with the scale economics of the cloud. Unify all your services across hybrid- and multi-cloud. Start building cloud-native applications and services today.

CUSTOMER VOICE

"As we evaluated API platforms, it was critical that the vendor we chose could simultaneously support our existing services in the public cloud with what we are building in Kubernetes. Kong offered us the ability to unify services across clouds, which gave us the flexibility to build new services iteratively and how we wanted without fear of cloud lock-in."

Jason Rodriguez,
VP of Engineering at SoulCycle

## Achieve Cloud Scale Instantly

Start building cloud-native applications immediately. Localize services within region to minimize latency and maximize uptime.

Learn More

## Connect All Your Services

Bridge the gap between all your services with zero effort or downtime regardless of vendor, environment or platform.

Learn More

## Manage Hands-free

Unleash the full power of Kong Enterprise without impacting development teams. Stop managing APIs, focus on building services.
