

The Authentic Sound of Analog.

Universal Audio's UAD-2 Powered Plug-Ins provide the world's finest analog hardware emulations for Mac and PC. Our DSP engineers work with the original hardware manufacturers — using their exact schematics, golden units, and experienced ears — to create fully authenticated plug-ins with all the warmth and harmonics of classic analog equipment.

FEATURES

- Access the world's finest plug-in emulations of classic analog hardware on your Mac or PC
- Includes UAD-2 OCTO DSP Accelerator Card (eight-processor / PCIe format), plus software plug-in bundle(s) listed at right
- 14-day demo periods included for all UAD plug-ins; additional plug-ins can be purchased at UA's Online Store
- Compatible with Pro Tools, Logic Pro, Cubase, Live, Digital Performer and more
- Can be combined with other UAD-2 devices, including UAD-2 PCIe card(s), UAD-2 Satellite and Apollo audio interface
