Prodigy Pro 35mm

The PRODIGY Series Thermal Monoculars are compact and lightweight (6.1 lb.) thermal viewing devices designed for scouting with the user comfort in mind. The device main functions include: ON/OFF/standby mode, zoom, brightness and image polarity adjustments (white, black & red), are easy to operate in total darkness by engaging with only three user-friendly control buttons.

PRODIGY PRO includes Wi-Fi compatibility for use with a free app found on the GooglePlay Store. It also has a large 35mm lens and 2.0x optical magnification (4x digital) allowing for enhanced image detection and greater distances in order to suit more demanding users.
