## TREATMENTS

### Skin Revitalization

Cosmetic procedures have increased by 39% over the past five years (from 2011) with surgical procedures up 17% and nonsurgical procedures up 44%.\*

Aging can bring unwanted changes to the skin – in the form of wrinkles, fine lines, enlarged pores, rough texture or a dull tone. As a result, many people are striving to restore their youthful glow, looking as good on the outside as they feel on the inside.

## Indications

- Mild – Severe Rhytids
- Poor Texture
- Enlarged Pores
- Dullness

## Product Solutions

- HALO™ (/physicians/halo/)
- Contour TRL™ (/physicians/contour-trl/)
- ProFractional™ (/physicians/profractional/)
- ClearSilk™ (/physicians/clearsilk/)

*\*Resource: ASAPS, working with an independent research firm, compiled the 19-year national data for procedures performed from 1997-2015.*
