What makes us "Green"?

How do we do it? What makes us "Green"?

Rather than adding new brick and mortar imaging centers, we purchase unused capacity at existing imaging centers at a discount and pass that savings along to individual patients and employer funded health plans.

Our images, reports, invoicing and records are all electronic, no film or paper waste.

We provide centralized access to almost 1000 centers nationally saving patients untold hours in aggregate shopping for high quality care at affordable prices, they keep more "green" in their bank accounts!
