A Constant Pulse on Your Business

Identify opportunities and remediate threats fast

Turn Data Into Action

Go beyond observability, act on your data

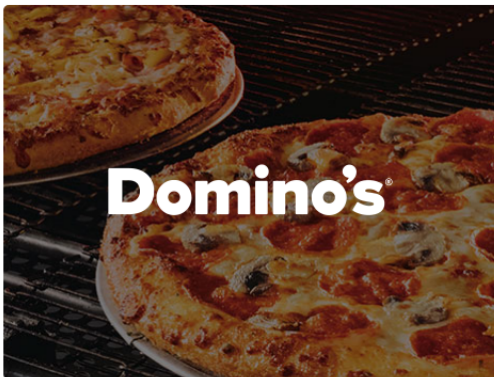

Build for a Data-Driven Future

Prepare for a world where everyone needs data access

Our investigative approach to managing data is designed for an evolving, chaotic world where data comes from all kinds of sources, in all kinds of formats. Splunk doesn't force you to structure your data before you ask it questions, allowing for unlimited questions and faster answers regardless of an organization's unique environment. Additionally, we treat all types of data equally for faster time-to-value from future data types and sources.

[Get Ready for the Data Wave](#)

“We trust Splunk with our most critical environments. More than half our business is through our digital channels, and Splunk is our eyes into all those services and channels.”

—Mike Cox, Operational Intelligence Architect, Domino's

Use All Your Data

Splunk makes it possible to use any kind of data from any source for real-world action at machine speed.

Amplify your data's impact

In a connected world, the very same data that helps identify and avoid app failures might also be critical to security investigation and customer experience updates. Rather than piping that very same data to multiple systems for different data questions and different users, we empower users from across the business to ask questions of their data regardless of their data fluency on one platform.

Contact Sales

Act faster, resolve issues quickly and accelerate innovation

As data becomes increasingly dynamic and real-time, rather than static and transactional, organizations need a platform that doesn't require them to slow down. Splunk is designed for real-time data with purpose-built apps on a single platform to help your people solve problems and spot opportunities faster.

Learn to trust your data

Organizations need more than assurances of safe keeping, they need systems that are trusted, secure and source agnostic. It's why governments, financial institutions, healthcare providers and startups trust Splunk. We're committed to data from all kinds of sources, no matter what platforms you use.
