Chiropractic Care

Chiropractic care is the single largest alternative health specialty in the United States—it is considered an alternative specialty as it is mostly concerned with the body's remarkable ability to heal itself by placing focus on the relationships between the musculoskeletal system, the nervous system, and how they behave in correspondence with the rest of the body and its overall health.

At ChiroPro, we provide extensive, comprehensive chiropractic care for patients, both young and old, and we will treat your whole family like you're a part of ours. Our office is an Integrity Doctors Verified Chiropractic Office and awarded with the Five Star Quality Service award. Our office holds the Integrity Elite Status – a designation for fewer than 300 locations worldwide.

Why Choose Chiropractic Care?

Our talented and knowledgeable chiropractors are highly skilled in pinpointing and treating the neuromusculoskeletal conditions that are causing you pain. When the muscles, joints, and nerves are all working together in harmony, you will feel healthy, but any interferences in these three can correlate to a plethora of health conditions.

At ChiroPro, we will perform comprehensive neurological and orthopedic exams to detect the source of your pain or other health concern. With the information we gather from these examinations, we will know what kind of manipulations and adjustments to make on your body.

The adjustments we make will relieve pain as well as improve the function of your neuromusculoskeletal systems and the relationship they have with one another and the rest of your body.

What Conditions Can Be Treated with Chiropractic Care?

There are literally hundreds upon hundreds of conditions that can be treated with chiropractic care. Below is an example of some of the most common conditions we treat at ChiroPro:

- Low back pain
- Neck pain
- Headaches
- Hip pain
- Sciatica
- Joint pain
- Herniated discs
- Ruptured discs
- Bulging discs
- Sciatica
- Subluxation
- Traumatic injuries
- Sports injuries
- Migraines
- Asthma
- Allergies

In addition to these, with chiropractic care, we can also treat many kinds of pain—from chronic pain to pain in the back, neck, and shoulders.

The safe, holistic, medication-free treatment we offer enables the body to remedy itself. Working closely with the spine, the treatment you receive is directly related to your central nervous system, which is responsible for regulating all of your bodily functions.

To learn more about chiropractic care, browse through these pages, and if you have any questions, please give us a call. We look forward to hearing from you.

With the safe and effective chiropractic care that you will receive at ChiroPro, your body will be able to heal as it is designed, better prevent injury and pain, as well as function and move as it was intended!

Physiotherapy

Physiotherapy is a health science that focuses on physical strength, movement, and function. A main objective for chiropractors is to help their patients achieve optimum physical well-being by teaching, supporting, and guiding the patient on how to gain control of these aspects of their physical well-being.

Shiloh Chiropractic offers physiotherapy to patients of all ages and backgrounds. Whether you've recently suffered a severe injury or are struggling with a disability, we can help you get back on your feet again.

At ChiroPro, we also offer physiotherapy services for patients who have lost some movement and/or function as a result of a disability, health condition, or injury.

With special movements and focused exercises, our talented chiropractors and therapy assistants help to facilitate recovery, manage symptoms of pain, and prevent further complications from developing. Our chiropractors also perform manual therapy and provide valuable advice and education for our patients so they can remain as independent as possible. When necessary, our office can help coordinate physical therapy services and referrals.

When Physiotherapy Can Help

Our chiropractors and therapy assistants are trained to incorporate their skillset and knowledge to treat a wide range of conditions associated with various systems of the body. Here is a list of what issues physiotherapy can help improve:

- Postural issues
- Spinal imbalance
- Muscle imbalance
- Range of motion loss
- Muscle pain and stiffness
- Arthritis
- Whiplash
- Strains and sprains
- Sports injuries
- Personal Injuries
- Chronic pain

Physiotherapy relies on you, the patient, also being proactive in your recovery in order to effectively restore and then maintain mobility. Our compassionate chiropractors and therapy assistants want to empower you with awareness and the resources you need to get involved in your own treatment—especially when you're not in our office.

Physical Medicine Techniques Used at ChiroPro

There are many treatment techniques your chiropractor has in his or her toolbox that can be used to help restore your mobility. Here are a few of the approaches you might see as a physiotherapy patient at ChiroPro. These include but are not limited to:

- Chiropractic adjustments (Spinal Manipulative Therapy)
- Joint mobilization and manipulation
- Instrument-assisted soft tissue manipulation (Graston)
- Taping and strapping
- Passive stretching
- Whole-body vibration
- Traction
- Electric Stimulation
- Therapeutic Exercises

Regardless of your condition, physiotherapy performed by our chiropractic physicians can help shorten your healing time and maximize your improvement.
