SUPER SLIM HIGH SPEC CHRONOGRAPH WITH FLAT DESIGN CONCEPT

Introducing a new model that features a smartphone link and the thinnest design in the series.

With this model, the engineers have achieved a slim design of just 8.9 mm, despite the multiple hands in the chronograph and the inclusion of high-spec functionality such as Bluetooth® and Tough Solar.

The reductions in thickness have been accomplished by incorporating high-density, one-sided mounting technology and further reductions in the thickness of the module parts.

SOLAR POWERED

G-SHOCK OCEANUS EDIFICE PRO TREK BABY-G SHEEN

EDIFICE Connected
(smartphone app)

Easy operation of various watch functions
