- Customers Also Viewed

The UltraUSB Hub is designed specifically for use in competitive robotics, and gives you the ability to connect multiple USB devices to each other as well as replacing cables when damaged instead of needing to replace the whole hub. The UltraUSB Hub can also be powered externally, allowing for USB peripherals like the [Logitech C270 UVC USB Camera](#) and [Logitech F310 USB Gamepad](#) to operate with the power they need.

FEATURES

- 2-port USB 2.0 hub
 - 2 downstream USB A ports
 - 1 configurable upstream port
 - USB Micro-B OTG
 - USB A
- Powered and un-powered operation
 - External power through JST-PH 2-pin power port
 - Upstream power through upstream port
- Removable JST to USB cables for easy replacement
 - Cables retained within case for strain relief

SPECIFICATIONS

- Nominal Input Voltage: 5.0V
- Maximum downstream current:
 - Un-powered: host dependent
 - Powered: 500mA per port

KIT CONTENTS

- QTY 1 - UltraUSB Hub
- QTY 1 - JST-PH 4-pin to USB-A Cable for upstream data
- QTY 1 - JST-PH 4-pin to USB Micro-B OTG Cable for upstream data
- QTY 1 - JST-PH 2-pin to 3-pin 0.1" (PWM/DuPont) Connector Cable for power
- QTY 1 - JST-PH 2-pin to USB-A Cable for power
