FTC TEAMS: If you have registered with FIRST for the 2019-2020 Season, this same kit is available at lower subsidized price through the FTC Storefront. Additionally there is a discount code in the FTC Storefront if you wish to purchase additional kits through REV Robotics. You must enter that code at checkout to receive the discount. We can't retroactively apply this discount, it needs to be applied at the time of purchase.

The code can be found by logging into the primary contact's account at www.firstinspires.org, clicking on "Payment and Product" then "Order Products" under team options, clicking "Support" in the upper right corner of the next page, and then clicking "How to Order Extra Parts" in the lower left of the next page.

Over 1300 parts are included in this starter kit specifically created for FIRST Tech Challenge teams, providing exceptional robot design flexibility. The REV FTC Starter kit is the result of over 40 years of experience with FIRST robots, as well as loads of additional goodies from team members. Supported by extensive design examples and documentation, the parts in this kit will give your team a head start to a great season!
