# FutureView<sup>SM</sup>

Flexible • Scalable • Small Footprint • Wireless

**Our proprietary FutureView<sup>SM</sup> system takes meeting space projection to a whole new level.**

Five-Star's FutureView<sup>SM</sup> system makes traditional tripod screens and projection carts obsolete. Using our proprietary platform, attendees will have the best possible viewing experience with projected content.

**FutureView<sup>SM</sup> helps to keep your presentation message the main focus, not cords and cables.**

## Key features include:

An integrated Parallax Screen (100") designed to accept illumination from a specific angle, ensuring that images are displayed to their fullest potential — all with zero distortion from ambient light!

A powerful 4500 Lumen Laser Projector with Extreme Short Throw Lensing maximizes space efficiency in the meeting room while providing a crisp and clear visual display.

Wireless HDMI connectivity helps to create a new interactive experience for meeting spaces and increases mobility for the presenter.
