

about us

Through our **experience and knowledge** we help you produce **higher yields** while **reducing risk, solving production problems and increasing profits.**

EcoN

The N stands for nutrition. Whether you want to manage your risk of nitrogen loss to the environment or optimize nutrition programs for maximum economic yields on your farm, this systematic approach to nutrient management is for you. You can use the entire Eco N system in conjunction with High Q data analytics or simply employ the relevant parts of the Eco N program to meet a specific nutrient management need on your farm. This program combines the best of both Ecologic and Economic decision making tools to drive your profitability and lower your environmental footprint.
