Cyber Threat Defender

CIAS Gaming	About	Get CTD	Tournament	Rules	Card List	Instructors	Sponsors

Cyber Threat Defender is designed to teach cybersecurity principles and a wide range of security issues. Whether playing the collectible card game, or the electronic version, you can also build up your defense strategies with booster cards and implement a strategy for expanding and protecting your network to win the game! Information is found below on how to order your Cyber Threat Defender cards; you can also download your free copy of the electronic game by clicking on one of the following links:

Click Here for your free Windows download.

Sponsors

Cyber Threat Defender has been successfully integrated into more than 400 schools and classrooms with focused STEM programs on technology! Due to the high demand, CTD is now available online to help more schools give students access to the game. By sponsoring the PC version of CTD, you are supporting STEM programs that are engaging the next generation of cyber professionals.

To learn more about becoming a sponsor of the electronic version of Cyber Threat Defender to help us change how cybersecurity is taught and learned in schools, download the Cyber Threat Defender Sponsor flyer for the PC game.

The Collectible Card Game

Starter decks are designed to teach the essentials of cybersecurity information and features 54 asset, defense, attack and event cards. Gameplay requires one card deck per player. Each booster pack is unique and designed to enhance the starter deck. Booster packs feature 12 specialized cards.

To order your Cyber Threat Defender starter decks and booster packs, please visit our online store at the CIAS Marketplace Here. You can also order game accessories, such as game mats and t-shirts, in our virtual store. Below is a sample of what is available on CIASMarketplace.com.
