

A LITTLE ABOUT US

i PAINTING.COATINGS.SURFACE RESTORATION.

LIME Painting® specializes in painting, coatings, and surface restoration for custom homes and businesses. After all, custom properties are made up of many surfaces that deteriorate and become outdated over time, but each surface requires its own type of coating to protect and update it. Paint is merely one of the many types of coatings that is formulated for the surfaces that make up a custom property. And of course, a coating can't be applied to any surface as it must be restored first.

Whether it is restoring a distressed exterior or transforming an interior space, LIME's artisans do much more than just paint. From LIME's initial Virtual Reality Consultation to LIME's final project audit, customers are empowered with LIME's expertise and quality controls that are backed by new age technology at the palm of their hand. It's an experience for customers that allows for their imagination and personality to be expressed on the creative canvass that is their home or business.

It isn't just the ability that LIME has to paint ideas that set's LIME apart, it's the level of due diligence and expertise that LIME has for solutions on custom properties. Whether it is restoring stamped concrete, modernizing cabinets, installing epoxy floor coatings, retexturing the walls throughout an interior space, or any of the services LIME's artisans provide, LIME has vetted solutions with an aesthetic appeal that will last the test of time.

Our Portfolio is on YouTube

globe NEW BUILD. REPAINT. RESTORATION.
