

Aware is a custom biometric hearable platform for remote brain monitoring (EEG).

### The Aware Platform provides real-time and long-term data for use in:

- Detecting Seizures
- Diagnosing Sleep Disorders
- Developing biomarkers for Alzheimer's, Parkinson's and Dementia
- Drug Efficacy testing for pharmaceutical companies

## What Makes The Aware Platform Unique?

**Custom Built**  
Built from our proprietary 3D Ear Scanner which ensures accuracy and repeatability

**Biometric Hearable**  
In-ear device leverages the anatomy of the entire ear and its proximity to the brain

**Adaptable Platform**  
The continuous AI backend is adaptable for specific medical domains

**Non-Invasive Access**  
Enables ambulatory longitudinal brain studies and non-invasive MTL access

**Patient Trials**
