What is WebStarts?

WebStarts is everything you need to create and maintain your very own website. Traditionally websites are written in HTML code, that code is stored on a server, and a domain is pointed to it. The process of setting up a traditional website is tedious, technical, and expensive. If you don't know how to code you might hire a web developer. Next, you need to purchase server space. Finally, you need to register a domain. It's a hassle to manage three different bills and three different companies. The whole process is so confusing it leaves a lot of people wondering how to make a website at all.

With WebStarts you don't need to know any code to create a beautiful website. Our easy to use drag and drop editor makes it a breeze to place photos, text, and other elements exactly where you'd like them to appear on your page. And when it's time to add a domain name, you simply choose one and it's automatically set up to work with your site. You'll never have to worry about hiring an expensive web designer or not being able to make changes to your website in a timely manner again.

- Web hosting

  WebStarts hosts your website in the cloud. So you'll never have to worry about configuring web servers, using an FTP program to transfer files, or configuring IP addresses again.
- Domain names

  When you create a website with Webstarts you can add a domain name to your website and it starts working instantly. There's no fiddling around with registrars, DNS, or pointing IP addresses.
- Design tools

  You don't need to have a web design software program installed on your computer to make changes to the look and feel of your website. Just log in and everything is drag and drop. Nothing could be easier.

How Is WebStarts different from other website builders?

Most website builders limit you to choosing from one of the same boring templates already being used by hundreds, if not thousands of other websites. Then their idea of customization is allowing you to swap out text and align it left, center, and right. Those type of limitations don't give you the flexibility and control required to succeed online.

With WebStarts the drag and drop editor provides a true 'what you see is what you get' experience. You're empowered to create a unique website that conveys the value of your products and services. In addition, WebStarts is jam packed with powerful features that would cost extra with our competitors. All of this is backed up with live support, based right here in the USA. Our friendly and knowledgeable staff is happy to help bring your website to completion.

It sounds great, so how can WebStarts be free?

When we started WebStarts we knew everyone was going to need a website, that means everyone. Knowing the wide range of uses for a website we decided to make the basic version of WebStarts free. That way everyone from the student to the biggest corporation can create a great looking
