## Fishing & Intervention

At PWS we have taken a fresh approach to fishing and intervention, bringing the tenets of sustainability into the mix. As with any fishing job, the primary objective is to retrieve items from the wellbore in an efficient and timely manner. To facilitate this end, **PWS has developed bespoke fishing equipment to aid in this challenge.** These tools range from our Patented ZOOM FX to that of a new range of fishing jars. **In the intervention space, we bring technology that breathes new life into existing wells, allowing our customers to capitalize on existing assets.**

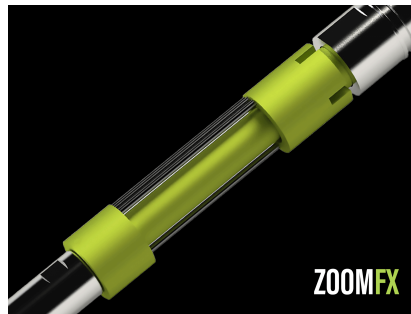

ZOOMCS/CX

### ZOOM™ CS/CX

The ZOOM CS/CX™ tool is a custom downhole vibration device for use in applications requiring slim-hole concentric pipe or coiled tubing downhole tool deployment in extended [...]
