Bond Bridge is a fast easy way to connect your ceiling fans to Alexa.

I have been using the Bond Bridge for just over a year. It works great with our three ceiling fans, with light fixtures on each.

I just got it to work on our storm shutters, as a generic device, but look forward to them expanding their "Shades" database.

★★★★★

Bought the bond bridge a few days ago. Despite concerns that it wouldn't connect to a hidden WIFI network, it does! And stays perfectly connected thus far. Seamless integration with three ceiling fans w/ lights that dim in 3 rooms and 10 circuits of somfy shades. LOVE IT. Mirrored the SOMFY remotes where each shade is a channel and the last channel controls all shades, so i can voice control them independently or together without Google Home routines, but did google home routines for other shade combinations NOT doable via SOMFY remote. Highly recommend!
