Merit ReadyNow

Merit's contribution to the fight against COVID-19. Free digital credentialing and verification for health professionals.

No deployment or support fees. No burden to your staff. Go live within days.

Currently, credentialing offices can spend weeks running background checks before medical professionals from other hospitals and states can work.

To tackle the administrative barriers of manual work and paper credentials, Merit ReadyNow provides the option to digitally connect and share medical licenses.

Merit is a central repository for all medical licenses, making verification immediate.
