UNDERSTAND CONTEXT

coumadin

aka

warfarin

e.g. Rx search knows to look for brand and generic results.

ILLUMINATE UNKNOWN, POTENTIALLY VITAL EHR DATA

SAVE VALUABLE TIME

15 clicks per encounter industry avg

vs.

1 click w/ CHARTSCOUT

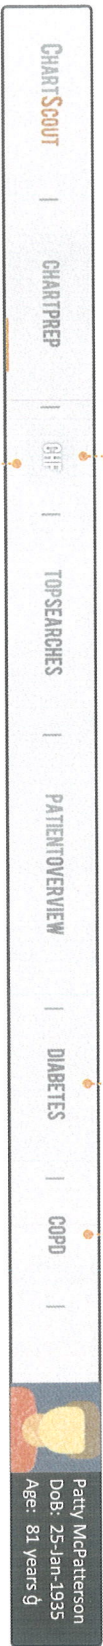

SAVES 4 minutes per encounter per user ADDING UP TO... 1 month per year per user

emerge™ MEDICAL DATA INTELLIGENCE

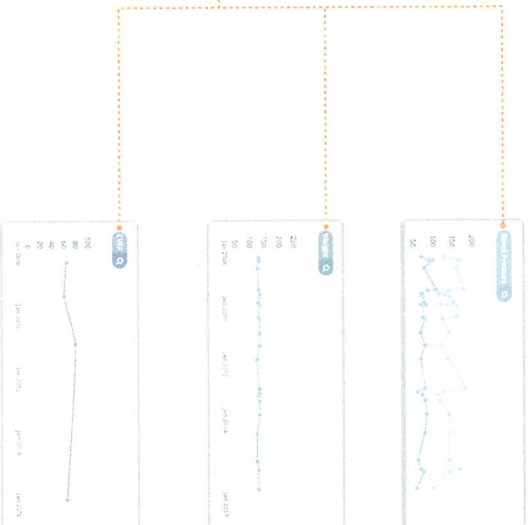

**CUSTOMIZABLE**  
Dashboards are designed to match needs and workflow; and can be created per specific patient clinical state.

**FLEXIBLE**  
Dashboards are created based on client requests. You think it, we build it.

**FOCUSED**  
Each Dashboard clearly details information relevant to the clinical state and provides the ability to drill down into more in-depth data with one simple click.

Dashboards apply clinical logic to align with the thought process of your healthcare professionals and boost efficiency when searching for patient data.

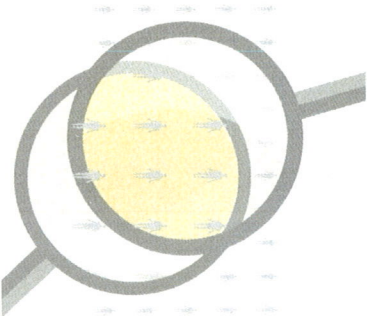

# Patient Stratification

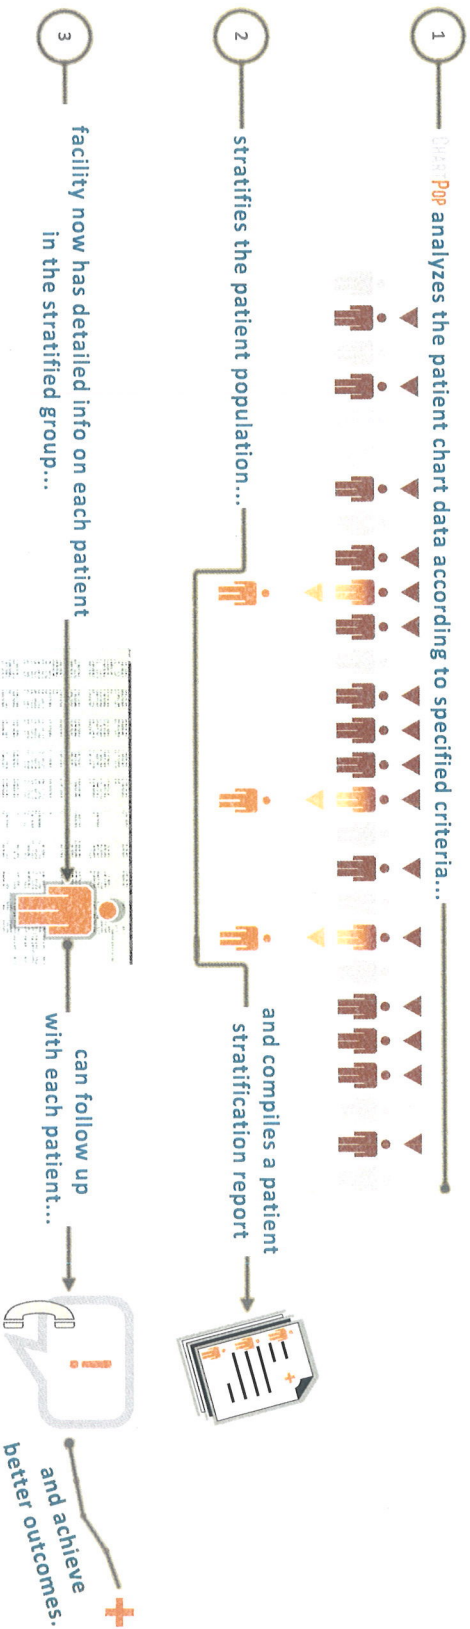

CHARTPOP brings you a tailored cross-sectional

view of your active patient population.

- Emergency Access
- Catastrophic Data Loss Recovery
- Data Redundancy

**CHART VAULT** is an emergency access tool that gives users complete access to their patient information, regardless of EHR connectivity. In addition, **CHART VAULT** allows for data recovery in the event of permanent loss. **CHART VAULT** eliminates instances of downtime when dealing with cases of ransomware, power outages, EHR non-connectivity, and/or natural disasters.

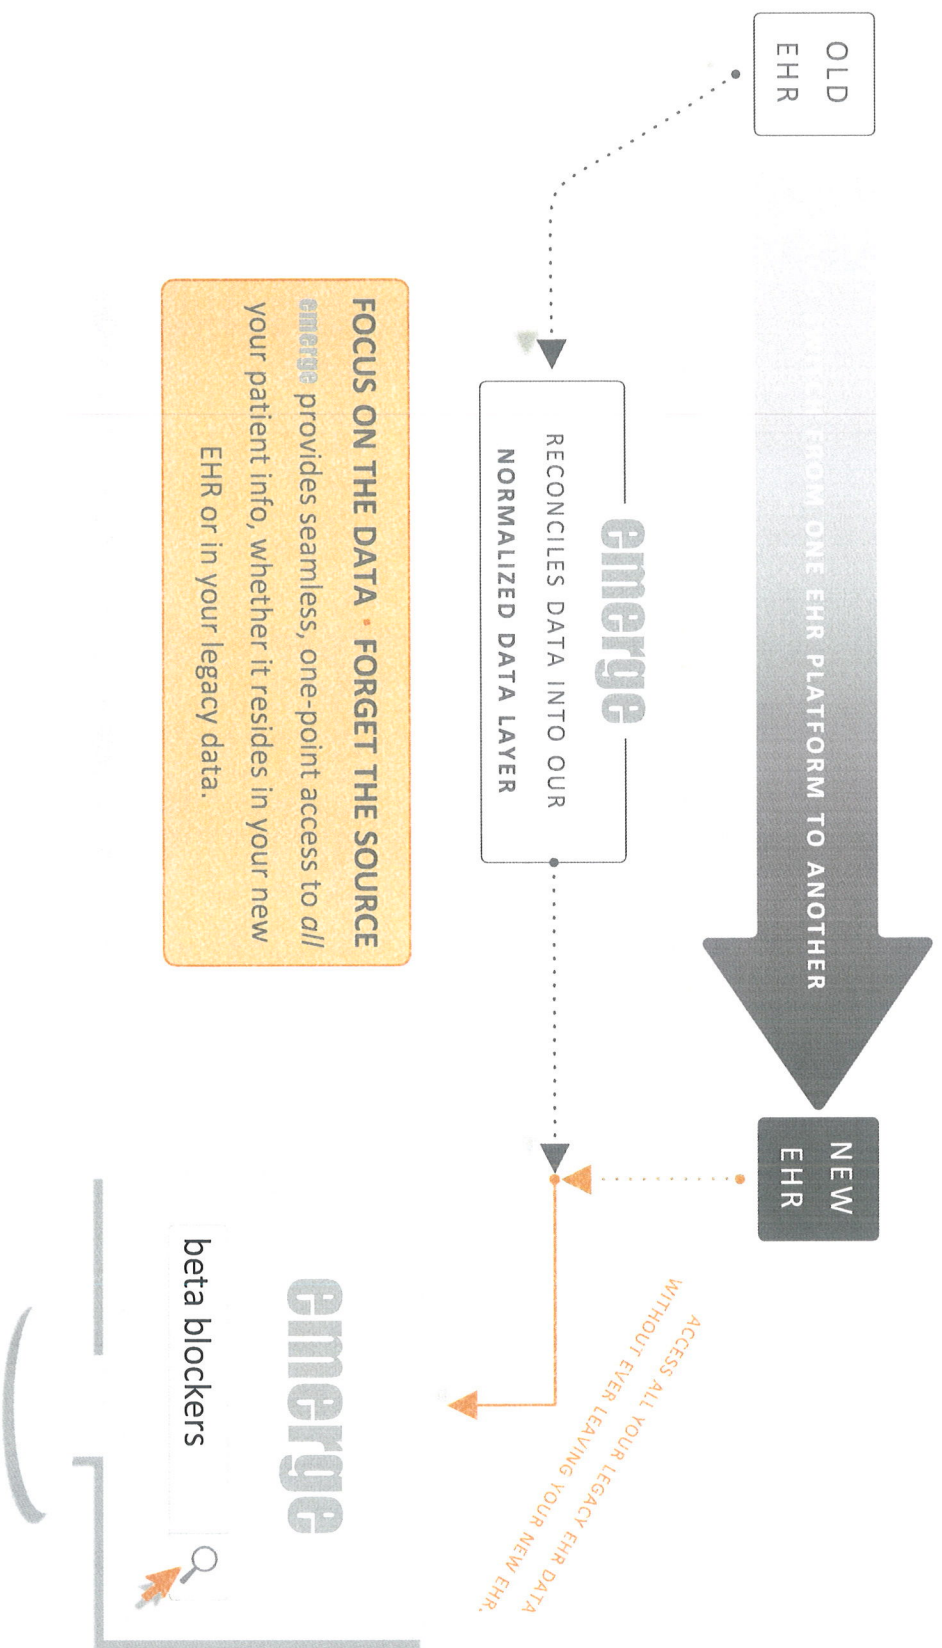

emerge™ MEDICAL DATA INTELLIGENCE

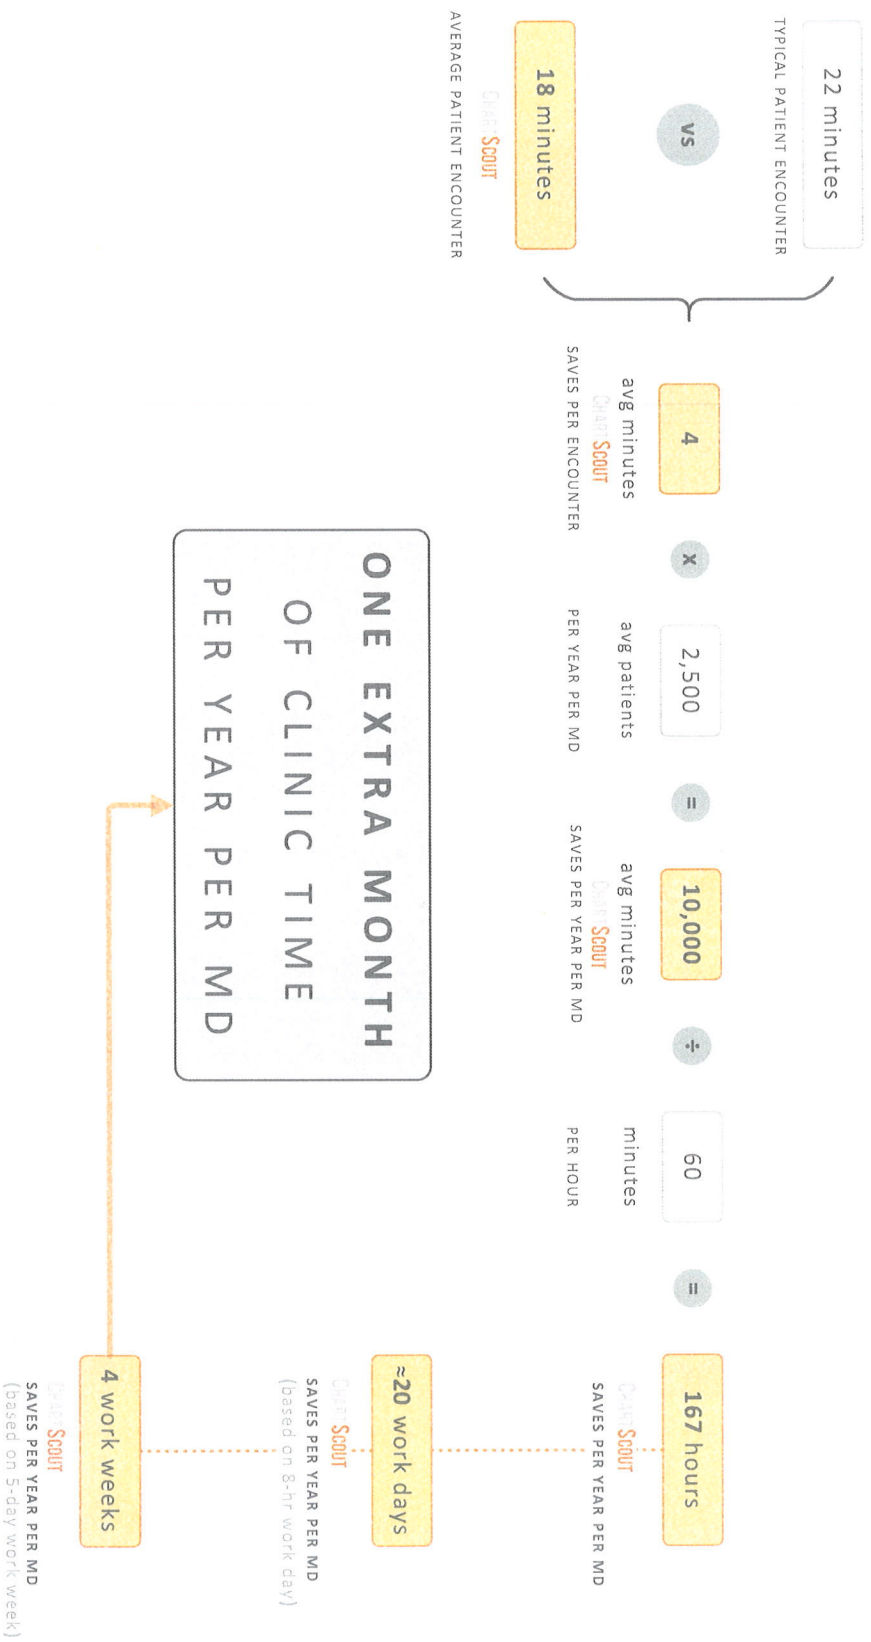

# **emerge** Seamlessly Migrates Your Patient Data

# Return on Investment with **CHARTScout** (BASED ON 1 PHYSICIAN)

<https://www.washingtonpost.com/news/fo-your-health/wp/2014/05/22/how-many-patients-should-your-doctor-see-each-day/>
