

RESEARCH & DEVELOPMENT

RESEARCH & DEVELOPMENT

FOCUSED ON SIMPLICITY, SPEED AND PRODUCTS
THAT GET THE JOB DONE

Rubicon's commitment to **practical innovation** R&D is a core competence, facilitated by a lean product development process and executed within our various **engineering, product line and manufacturing teams** around the world.

GLOBAL PRESENCE

+

DECADES OF ENGINEERING EXPERIENCE

+

STATE-OF-THE-ART SOFTWARE + TECH

EXCEPTIONAL PRODUCTS

With operations positioned across Western and Eastern Hemispheres, our global presence provides the agility and scope to respond quickly to industry demands for product development. We apply decades of engineering expertise coupled with the latest state-of-the-art software and technology to produce exceptional products that address complex challenges.

REDUCING RISK IN INCREASINGLY COMPLEX OPERATIONS

The Rubicon team is local to the job at hand. Their local knowledge and connection to the region ensures that our R&D is intimately connected to the specific, real-world challenges of our customers, wherever they may be. Our world-wide experience has forged longstanding ties with operators in diverse basins around the globe. These connections enable us to provide products that are tailor-made for their specific challenges and also satisfy mandates for locally manufactured content for those basins.

Stay in the know.
