SOLDIER SURVIVAL

Tribalco engineers battlefield-tested medical care solutions for tactical operators across the globe

From designing Tactical Combat Casualty Care (TCCC) Casualty Evacuation (CASEVAC) sets and other specialty equipment for the warfighter, to training medics on how to use them, Tribalco's Soldier Survival Division, also known as Division 6, specializes in lifecycle management of modular systems supporting the forward-deployed special operator.

Our customers don't work from 9 to 5... and neither do we

Delivering mission-critical services and solutions across industries, markets, and geographies means that we are ready when our clients need us.

TRIBALCO'S TACTICAL MEDICAL MODULAR SOLUTIONS

Tribalco's Soldier Survival activities include **engineering, procurement, kitting, warehousing/sparing, and training capabilities**. Our modular solutions are tailored to situations requiring high-level care during military, humanitarian, and disaster relief operations. They can also be easily expanded to support broader U.S. military operations; federal, state, and local government agencies; and international forces clientele.

ABOUT DIVISION 6: SOLDIER SURVIVAL

Facilitating battlefield rescue, recovery, and evacuation with specialized equipment and training services

Tribalco's Division 6 provides specialized operational equipment and tactical combat casualty solutions to the warfighter with the singular goal of enhancing soldier survival. Staffed and managed by an all-Veteran team, Division 6 leverages real-world experience, advanced program expertise, and worldwide logistical reach. Through a unique combination of tactical medical expertise, knowledge of new and emerging technologies, and a spiral development approach, Tribalco is delivering continuous innovation that is enhancing soldier survival in the most demanding locations across the globe.

TRIBALCO: DIVISION 6

Not secure | tribalco.com/div6.html

As the exclusive DoD supplier for the TCCC/CASEVAC program of record, Tribalco designs, integrates, and maintains systems supporting the forward-deployed special operator

DIVISION 6 SUPPLY CHAIN MANAGEMENT

Tribalco maintains sprawling warehouse with seven tractor-trailer docks in Tampa, Florida. This facility, managed by a dedicated team of Veterans, is adjacent to MacDill AFB, the home of SOCOM and CENTCOM. It is the kitting, distribution, and service center for the Tribalco TICS™ CASEVAC solution. Tribalco utilizes robust warehouse management tools to "pick, pack, and ship" critical life-saving items to DoD command components.

At our secure warehouse facility, we maintain an FDA Medical Device Certification and Hazardous Material Shipping Certification. The warehouse's central location provides quick access to seaports and international air transportation. Moreover, our Tampa warehouse maintains its status as a facility where government goods can be received and accepted. This status shortens the lead time of shipment to SOCOM, SOFSA, or directly to any component unit where time-sensitive contingency deployments are at issue.

TRIBALCO'S DIVISION 6 IS STAFFED AND MANAGED BY AN ALL-VETERAN TEAM

The dynamic combination of Veteran-derived field knowledge and high-tech products from our industry partners enables Tribalco to create the most advanced CASEVAC and soldier survival solutions on the planet

OUR PARTNERS

Tribalco partners with suppliers of top-tier technologies

As DoD's premier supplier for TCCC and CASEVAC sets, Tribalco maintains key partnership and supplier networks that give us access to the latest technologies, and enable us to provide SOFs, and other customers that require modular survival solutions, with the most up-to-date equipment available.

Tribalco's teaming partners have military, medicine, and technology expertise

Tribalco's Division 6 partners with industry leaders with expertise in military operations, emergency medicine, and emergent technology. Positive dialogue and lessons-learned assessments drive product development within these partnerships, which creates a world-class product for our end users.

OUR KITTING AND TEMPLATING PROCESS

From integration to final shipment, our kitting process earned a CMMI® Level 3 rating

Tribalco manages dozens of sub vendors who supply items that make up the TICS™ CASEVAC Set. The Set contains nearly a thousand medical items that are kitted in critical care kits with "grab and go" mission ready pack configurations. With these items, Tribalco creates 691 custom assemblies that are meticulously and identically packed for each custom configuration.

Tribalco utilizes custom kitting templates which include product outlines and part numbers to ensure that each CASEVAC kit contains the right quantity of each item and that every product is packed in the correct sequence. This process also saves medical providers precious time when they open a pouch in the field and are confronted with 100% consistency every time.

INFORMATION TECHNOLOGY ▶

TRIBALCO IS DOD'S EXCLUSIVE SUPPLIER FOR TCCC CASEVAC SETS

Working with DoD and SOF members from prototype to delivery, Tribalco designed, developed, and integrated an innovative, modular CASEVAC solution for U.S. SOCOM. This solution, known as the Tribalco Integrated Casualty Solution™, is made of up four modular units designed to enhance soldier survival on the battlefield.

FACILITATING BATTLEFIELD RESCUE, RECOVERY, AND EVACUATION

TICS™ delivers advanced capabilities for all phases of TCCC care

TICS™ combines access capabilities, mobility, and critical care components to support SOFs in far forward and austere environments where definitive medical support is not available. From extraction to mobility, transportation, and sustainment, TICS™ dramatically improves an injured service member's odds of survival and recovery.

TELECOMMUNICATIONS ▶

SOLDIER SURVIVAL ▶

TICS™ offers system modularity and accessibility along with options for multiple configurations. With the TICS™ solution, decentralized SOF teams are able to self-recover and keep soldiers alive from the point of wounding to the point of definitive care in the most remote environments. Tribalco's TICS™ sets are currently in use around the world and have been deployed on hundreds of missions.

OUR TCCC PORTFOLIO

Tribalco's TCCC solution incorporates engineering, procurement, kitting, warehousing/sparing, and training capabilities. Our innovative designs and constant spiral development allow us to stay current with technology that enhances survival on the battlefield.

TRIBALCO OFFERS FOUR MODULAR TICS™ KITS

EXTRACTION MOBILITY TRANSPORTATION SUSTAINMENT

TICS™ EXTRACTION KIT

Everything you need for rescues in high-angle conditions

The ability to self-rescue from compromised vehicles and structural collapses is a critical component of survival in combat zones. The TICS™ Rescue System (TRS) Extraction Kit ensures personnel have the tools necessary to extricate in high-angle conditions, self-recover casualties, and configure rescue vehicles for quick reaction force missions.

TICS™ MOBILITY KIT

Deploying life-sustaining technologies in the field
The TICS™ Field Care (TFC) Mobility Kit contains items advanced medics need to provide tactical field care. The TFC Mobility Kit has been enhanced through the addition of available care items and supplies, while minimizing encumbrances. The TFC Immediate Response Solution provides SOF advanced tactical practitioners with a specialized mounted option that enables them to custom pack the kit's contents in order to maximize their performance in grab-and-go situations.

TICS™ TRANSPORTATION KIT
 Delivering tactical field care when every second counts

The TICS™ Transportation (TT) Kit offers an innovative approach to delivering advanced care as quickly and as far forward as possible. The system was designed to reduce set-up time when transitioning from tactical field care to tactical evacuation care. All of the kit's critical components are packaged together so patient treatment may begin within minutes. To house the TT Kit's components, Tribalco engineered a system of small lightweight interlocking carbon-fiber cases. These carbon-fiber cases are designed to fit in available space in aircraft, watercraft, and ground vehicles. The TT Kit also includes a soft-case packaging alternative.

TICS™ SUSTAINMENT KIT
 Multi-day sustainment for multiple patients

As mission time lines increase and access to higher levels of care decrease, the need for care providers to operate self-sufficiently grows exponentially. In response to this demand, Tribalco's TICS™ Casualty Sustainment (TCS) Kit contains the equipment that medics need to treat patients over extended timeframes. The TCS Kit includes supplies to sustain multiple patients for three to five days in the field.

TRIBALCO INNOVATIONS

Raising the bar on pre-hospital battlefield medicine
Through a deep understanding of our clients' missions, our ability to stay current on battlefield tactics, and our strong/diverse partner relationships, Tribalco is able to develop highly relevant tactical medical products for our customers. We use a spiral development process to constantly improve our offerings based on feedback from the field, lessons learned, and TCCC principles. Our insight into the complexities of tactical medicine and the challenges SOFs face are linchpins of our success.

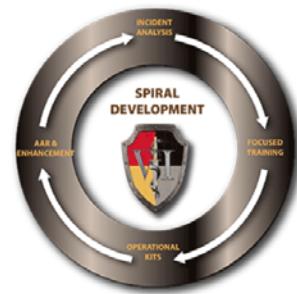

SPIRAL DEVELOPMENT APPROACH
Our innovative designs and

INNOVATIVE PRODUCTS

Division 6's mission is to increase the survival rate of injured soldiers, first responders, and law enforcement personnel

constant spiral development allow us to stay current with technology that enhances survival on the battlefield
All Tribalco soldier survival products are assembled in-house and are continuously being improved through exacting R&D.

Tribalco's products, deployed in hundreds of missions, are focused on the singular goal of saving the lives of our troops

Our insight into the complexities of tactical medicine and the challenges SOFs face helps us to address the issues medics encounter on the battlefield and inspires the development of new products.

TIFAK™

TRIBALCO INDIVIDUAL FIRST AID KIT (TIFAK)

Gives medics instant one-handed access to tourniquets and medical supplies

Individual First Aid Kits (IFAKs) are force preservation tools, meaning that the supplies and training behind the IFAKs have saved lives over and over again.

Tribalco advanced the utility of legacy IFAKs by working with active Special Forces medics and creating a revolutionary new life-saving product, the Tribalco Individual First Aid Kit (TIFAK).

The patented TIFAK system does a better job of holding supplies and allows the user to rapidly access tools, such as tourniquets, in high-stress situations. The modular design of the TIFAK and the TIFAK Mini allows them to be kitted in multiple combined configurations.

GOLDEN HOUR™ MEDIC

Tribalco's patented TIFAK is available in two sizes.
