Description

!!! We are working to update this to NP++ 7.6 as fast as possible. However there have been significant changes in the way plugins are handled with 7.6 - and we really want to bring the Plugin Admin experience to you. Please bare with us as we work through the technical challenges while maintaining store compliance !!!
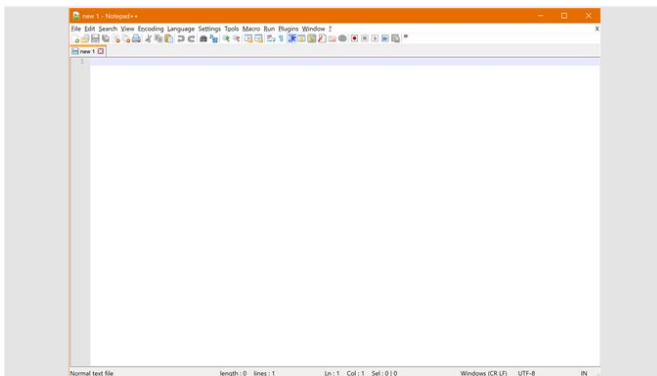

This is an (unofficial) Open Source fork of the original Open Source Notepad++ (https://notepad-plus-plus.org/) to get notepad++ in the store. All functionality remains the same however there are some features that dont work due to store policy, or are limited (like some file associations, and the run options). This is a published centennial application. All Credit to the original Notepad++ team, all the heavy lifting of creating an awesome app was done by them.

This is currently Notepad++ version 7.5.9 (updated in this update)

Code and changes required for publishing is located here:

What's new in this version

Please raise new issues at https://github.com/WoofyIO/notepad-plus-plus/issues/new

This update brings version 7.5.9 of the upstream official notepad++ client., for both x86 and x64 versions and updated plugins.

We have included MarkdownViewer++ and Compare plugins by default.
We have added support to call notepad++.exe from cmd or powershell

Notepad++ v7.5.9 bug-fixes:

Fix hanging problem while switching back a fully-folded document by using shortcut (Ctrl-TAB).
Fix possible file corruption during backup or power loss or other abnormal N++ termination.
Fix wrong backup file deleted issue.
Fix backup not fully disabled issue.
Add 2 command line flags "-notepadStyleCmdline" and "-z" for the replacement of notepad.exe.
See https://notepad-plus-plus.org/features/replace-notepad.html
Add new plugin API NPPM_REMOVESHORTCUTBYCMDID to allows plugins to remove unneeded shortcuts.
Fix Tail monitoring incoherent status after deleting a monitored file.
Fix issue with wrong smart highlighting when it is disabled.
Fix last active tab is ignored on Notepad++ restart issue.
Fix Tab non-responding by mouse click after dragging bug.
Fix switching back position restoring issue for wrapped document.
Add several spiritual quotes and a subtle Easter egg in the source code.

Upstream Included plugins:

1. NppExport v0.2.8 (32-bit x86 only)
2. Converter 4.2.0
3. Mime Tool 2.1
4. DSpellCheck 1.4.6 (updated)
