

# PANDAC

## Distribution and Warehousing

## Provider Inventory Solutions

## Manufacturer Logistics

## Custom Procedural Kits & Trays

## Data & Analytics

## Products & Sourcing

For more than 45 years, PANDAC<sup>SM</sup> has helped customers control purchases and eliminate excess wound closure inventory while maintaining supply levels. PANDAC<sup>SM</sup> includes dedicated on-site service, in-depth reporting and integration with materials management, business reviews and the ability to expand management to other product categories. Our expert will tap into patented technology to routinely monitor purchases and utilization, adjust stocking levels, and provide continuous reporting on all aspects of purchasing and inventory. We can provide the resources to manage wound closure inventory effectively—no matter which suppliers are used.

Clinicians need to deliver exceptional patient care. Too often, their time is spent managing inventory, which translates into thousands of wasted hours and dollars. With PANDAC<sup>SM</sup>, we will place an Owens & Minor teammate onsite to manage wound closure and other high-value supplies in each department-stocking location.

## Proven Savings, Ongoing Value

Using PANDAC<sup>SM</sup>, hospital administrators immediately gain access to all the information needed to check wound closure inventory status. These same reports enable Owens & Minor to make recommendations for controlling inventory costs and saving money in the O.R. setting. PANDAC<sup>SM</sup> users consistently save a minimum of 5% on their wound closure spend in their first year alone.
