

OWENS & MINOR®

INVENTORY SOLUTIONSSM

**PROVEN SAVINGS,
ONGOING VALUE**

PANDACSM RESOURCE MANAGEMENT

Maintaining a steady supply of high-value products is a delicate balance. Providers need sufficient stock on hand to meet patient care needs. However, having too much expensive inventory can lead to excessive costs and waste.

YOUR O.R. STAFF SHOULD MANAGE PATIENT CARE—NOT YOUR INVENTORY

PANDAC provides an on-site expert to manage wound closure and other high-value supplies in primary stocking locations within each department, using our patented technology to routinely monitor purchases and usage, adjust PAR levels and provide continuous reporting on inventory.

BUSINESS INTELLIGENCE TO CONTROL INVENTORY COSTS

PANDAC provides an accurate picture of the health of your inventory. Owens & Minor's reporting tools include:

- **DEPARTMENT SUMMARY** overview of purchases and inventory value for all managed locations
- **TREND ANALYSIS** to assess progress over the past five quarters
- **HIGH COST PURCHASES**, identifying items that have the greatest impact on average cost-per operative case
- **INDICATED USAGE AND STATISTICAL ANALYSIS** help identify key inventory variables within all managed locations
- **INACTIVE ITEMS REPORT** helps identify obsolete inventory
- **EXCESS INVENTORY VALUE REPORT** to identify all
